

Managing Microclimates in Your Garden

Participants will learn:

- How “climate” & “microclimate” are related
- Key factors affecting microclimates
- How to assess an area for microclimates
- How to manage and/or create microclimates for warm and cool season crops
- Which crops to choose for different microclimate areas
- About extending growing seasons
- Practical, easy-to-apply strategies that help you get better results from your garden.
